AVIATION COIN

In the digital world, issuing a coin is a capacity that seems to go beyond central banks. The new term in digital economy is “Token”, a unit of value created by an organization to govern its business model and give more power to its users to interact with their products, facilitating the distribution of benefits among all of its shareholders. This is the definition given by William Mougayar, author of the book ‘The Business Blockchain’.

In this way, “AVIATION COIN” wanted to dabble in this new business model. For this, a Token was created as a payment method accepted by the company, in other words, an exchange for tickets in air routes soon to be established and as a means of future investment. Tending to a fluctuating market and with excellent expectations, among other things.

Besides, an AVIATION COIN Token can be used as a means of exchange or payment. The purpose is the representation of value facing the posed objectives, which are connecting South America with North America, Europe and Asia.

Technological Base

Its technology is based on a chain of blocks or BlockChain, which allow transferring the information without any third parties.

Likewise, this technology constitutes the fingerprint of the digital process and is considered the source of validity of digital currency; betting security to its creation, support and exchange, promoting that a currency can be used or exchanged in financial processes.

Aviation Coin will count with the support of the Binance Smart Chain (BSC) network, which makes it into an auditable and transparent digital financial instrument that will facilitate the trust in its acquisition and exchange.

What is Aviation Coin?

It's the first digital Token created by a commercial airline company. This marks an unprecedented milestone in the region. Besides, it's very well structured under a real and tangible business plan with values, a structured business vision.

Furthermore, this Token will be a financial exchange tool at a macro, meso and micro economic level that will allow mobility of financial resources and their digital transformation into their equivalent of any type of currency or cryptocurrency.

How can you purchase it?

The Token will be gradually included in the International Exchanges, with which technological and financial alliances will be established. In any case, the free market will determine its use for the exchange of this crypto asset.

In this order of ideas, the technical description of the digital Token developed by albatroscoin.io and supported by the Binance Smart Chain (BSC) network will be named AVIATION COIN called as per the acronym (GOSKY).

The unit of the currency will be (01 GO), the minimum unit of the Token will be called (GO), which will be represented by the acronym (GOSKY), and represents or is equal to the millionth part of the unit of one (1) AVIATION COIN or GOSKY ($1/10,000,000,000$). Another way of saying it is: $1Go=0.0000000001$.

In this sense, in order to dissipate any uncertainty regarding the AVIATION COIN digital currency, we will clarify the following doubts that could arise to our users:

What is our offer to the market?

The capitalization of the company, guaranteeing that upon purchasing the AVIATION COIN Token, the user immediately becomes another investor of this project.

When can the user be able to invest?

At the exact moment when the AVIATION COIN (GOSKY) is publicly offered.

Where can they find us to invest: websites, platforms, etc.?

We will start at a decentralized exchange, which is:

<https://pancakeswap.finance/>

How can they do it?

They can do it from their wallet from their phone or computer through wallets such as: trust wallet, metamask and binance chain.

With which coins can they do it?

The main pair to be traded will be: bnb/gosky (gosky= aviation coin).

How can they know the cost of our coin?

The cost will be defined by the free market.

How can they know how much Aviation Coin they have saved in their wallet?

You choose a wallet from the ones previously mentioned where the balance in aviation coin and bnb or dollars will be shown.

Where can they see the daily value of this currency?

Specifically at: <https://pancakeswap.finance/>

However, we could be included shortly in other exchange platforms, which we'll be publicly informing.

Can the user ask for his money?

Of course! Immediately, whenever they wish to do so.

When can they ask for reimbursement after their first investment?

Funds will be available 24 hours a day, 7 days a week immediately after their purchase.

What are the conditions?

Any person can acquire them without any restriction whatsoever.

Where are your contributions sent?

The investment you make in AVIATION COIN will be directed to aeronautical projects to increase the installed capacity of the air routes operated by the Albatros Airlines and Nella Airlines. Through the update and purchase of the aircrafts they operate. Besides all that, many strategies are being designed in order to offer our users a better cost benefit relation to our users that will be progressively developed, such as:

- FIDELITY PLAN
- PAYMENT METHOD
- FUTURE INVESTMENT

When will this be done and what are the studies of these projects and feasibility?

All of the projects are developed, but an investment capital is required for executing the works. What we're looking for through the Token is to precisely capitalize the company for the development of all the projects.

Are there several projects? Which is the main one?

The main one is updating the aircrafts.
